Scott,

This is to acknowledge that these comments will be included as part of the public feedback on the second draft of Good Forestry.

Thank you,

Karen

Karen,

As for last night's meeting, I was quiet, and for good reason. I would like to commend you and the steering committee on listening to us, the folks not as involved from the start, on taking the extra time and revising the original draft. I have read most of the newly revised draft, and although I don't agree with everything and likely never will, I feel the effort was made at editing things down, and am please overall. I understand the need for keeping many of the chapters I originally thought should be deleted. I also like how you combined chapters, which was what I was trying to suggest from the beginning. There really was a lot of repetition, and I no longer get that sense in the new draft. I also think it was great to add the AG's statement and State Foresters comments to solidify that this act as a set of guidelines and not to aid in future regulation.

Once again, thank you for considering my comments.

Scott

Hi Scott,

I reminder to send me a copy of the letter GSD/SAF wrote about BCAP. Thanks.

Also thanks for coming to last night's meeting. You were quiet but perhaps you will send comments later. Just so you know, we found your comments on the first draft very helpful. I know you suggested that some chapters should be deleted that didn't get deleted, but we felt we couldn't delete some things given our charge to include sensitive areas. I hope you see that we did incorporate many of your suggestions.

Thank you for the time you have spent on this project.

Karen
