subject Review of 2nd draft - Good Forestry in the Granite State  
signed-by myfairpoint.net

Last night I attend the public review session at Lancaster. This morning I looked at selected contents of the draft. In Deer Wintering Areas under Considerations, 10<sup>th</sup> bullet down a text change is needed. It should read, .... as long as mature softwood ...

Hope this minor change helps.

I believe this 2<sup>nd</sup> draft meets its intended purpose. I can live with it, practice forestry using these guidelines and recommend it to forest landowners to read and refer to.

The work of the team that prepared this revision is appreciated!

Thank you,

Walter Wintturi

P.S. Now get it out the door!
